

LW Series

Designer

Laurens van Wieringen

The flexible yet sturdy LW lamps are made from soft rubber by using dip moulding technique. Double dipping give the lamps a different structure and color on the inside and outside. The inside looks like porcelain while the outside is matte and lightly structured.

DeVorm

Specifications

- Lampshade
- Vinyl
- Stock colour options
- Grey outside with a yellow cord and a black outside with a black cord.

Ingredients

- Vinyl ceiling cap
- Vinyl Lamp shade
- PVC cord
- PE plug
- Metal screw hook
- PE - lustre terminal
- ABS lamp holder
- PP Strain relief

Dip moulding

Dip molding is a method which is used to produce a durable, solid end product that has to meet high standards. The used material (vinyl) is very suitable for the production of complex shapes, large and small, in all kinds of colours.

Double dipping gives the lamps a different structure and colour on the inside and outside.

Bespoke option

Customize colour of the cord

When ordering a minimum of 5 LW lamps of the same model and colour, the colour and length of the cord can be customized. The cord is available in black, yellow and red.

Measurements

LW 2 Package weight – 0,69 kg

Package size – 34 x 21 x 8 cm; 0,01 m³

LW 3 Package weight – 1,38 kg

Package size – 30 x 30 x 33,5 cm; 0,03 m³

LW 4 Package weight – 1,44 kg

Package size – 30 x 30 x 33,5 cm; 0,03 m³

LW 5 Package weight – 1,58 kg

Package size – 30 x 30 x 33,5 cm; 0,03 m³

No denting

DeVorm

We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

We like a product because of its functionality.

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

We continuously raise the bar.

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
